

# LEGVALUE

Fostering sustainable legume-based farming systems  
and agri-feed and food chains in the EU

## How legumes can contribute to reduce the EU protein deficit ?

### 4<sup>th</sup> June 2019

### Soest - Germany

Kindly hosted by  
Fachhochschule Südwestfalen

This project has received funding from the European Union's Horizon2020 research and innovation programme under grant agreement n° 727672.

## About the LegValue Project:

LEGVALUE is a participatory project, open to the engagement of stakeholders in the pulse and legume industry in Europe.

The objectives of LEGVALUE are to define platforms for change that can help deliver greater EU self-sufficiency in vegetable protein production; to identify opportunities for innovation, adding value to markets and all participants in the value chains and; to recognise opportunities to influence change, be they at commercial, research or at policy level.

The ultimate benefits are the fostering of greater, more profitable legume and pulse production in the EU to satisfy a larger more valuable and diverse market to the financial benefit of all in the value chains and to deliver social and environmental benefits to all

During the project stakeholders will have the opportunity to be included in an open access network and European stakeholder directory. It is intended that the established network should survive the project as a stage, a virtual organisation representing interested parties involved in pulses and legumes in Europe.

The project consortium consists of 24 Research and Industry partners and will study a wide range of value chains, producer networks, processors and markets. This will be combined with environmental studies and the impacts of policy propositions, ultimately outlining and recommending opportunities to influence pathways for change all along the supply chain.

Engagement of any interested stakeholder is encouraged regardless of whether they are involved in the original consortium and regardless of the commitment they are able to give.

## How legumes can contribute to reduce the EU protein deficit?

**9:00 – 9:30 WELCOME AND INTRODUCTION OF THE DAY**

The Dean of Fachhochschule Südwestfalen: Prof. Dr. Wolf Lorleberg

LegValue Coordinator: Frederic Muel – Terres Inovia

Marcus Mergenthaler – Fachhochschule Südwestfalen

**9:30 – 10:30 HOW ARE LEGUME CROPS VALUED IN EUROPE?**

INSIGHTS FROM THE ANALYSIS OF STAKEHOLDERS' ECONOMIC BEHAVIOURS IN SEVERAL VALUE CHAINS

CASE STUDIES IN THE H2020 LEGVALUE PROJECT

45' presentation, 15' discussion

SPEAKERS: Tiana Smadja –Terres Univia, Marie Benoit Magrini – INRA

---

**10:30 – 11:00 COFFEE BREAK – POSTER SESSION ON VALUE CHAIN CASE STUDIES**

---

**11:00 – 12:30 EUROPE MOVING ON PROTEIN**

The development of plant proteins in the EU (20')

SPEAKER: Karel van Bommel – European Commission – Unit G4 Arable Crops and Olive Oil

National Protein plans (20' each)

SPEAKERS: (FR, DE, ...)

**GENERAL DISCUSSION (20')**

---

**12:30 – 14:00 LUNCH BREAK – POSTER SESSION AND SPEED DATING**

---

**14:00 – 15:00 DIAGNOSTIC OF RELEVANT POLICIES AFFECTING LEGUMES AND UNDERSTANDING THE EFFECT OF CURRENT POLICY SETTINGS.**

45' presentation, 15' discussion

Speaker: Liz Lewis-Reddy – RSK ADAS UK LIMITED

---

**15:00 – 16:00 STATUS OF PULSE RESEARCH AND DEVELOPMENT PROGRAMS**

DemonetErBo: pea and fababean Network (20')

SPEAKER: Ulrich Quendt – DemonetErBo

Transition paths to sustainable legume-based systems in Europe (TRUE) (20')

SPEAKER: Pete Iannetta – The James Hutton Institute

Legume translated network (20')

SPEAKER: Donal Murphy-Bokern

---

**16:00 – 16:30 GENERAL DISCUSSION AND CONCLUSION (30')**

---
